ADVANCES IN BREAST CANCER MANAGEMENT 2019

Mayo Clinic School of Continuous Professional Development

COURSE HIGHLIGHTS

This course will provide an overview of the most recent advances in the management of patients with early and advanced stage breast cancer. Topics include imaging, radiation therapy, surgery, genomic testing, systemic therapy, survivorship, and palliative care. The course is intended to provide practical, evidence-based information on clinically relevant issues for physicians and allied health personnel involved in patient care. The didactic format will provide significant opportunities for interaction with the expert faculty and other attendees via interactive keypad systems, case presentations, panel discussions, and open question and answer sessions.
